What are Cookies?

We ask that you read this cookie policy carefully as it contains important information on and our use of cookies on our website.

Cookie Policy

Cookies are small data files that are placed on your computer or mobile device when you visit a website. Cookies are widely used by online service providers to help build a profile of users. They are also used to make websites work, or work more efficiently, as well as to provide information to the owners of the site. Some of this data will be aggregated or statistical, which means that we will not be able to identify you individually.

You can set your browser not to accept cookies and the websites below explain how to remove cookies from your browser. However, some of our website features may not function as a result.

Types of Cookies

The cookies we place on your device fall into the following categories:

Persistent cookies—these are stored on your device in between browser sessions. These allow your preferences or actions across our website to be remembered. These will remain on your device until they expire, or you delete them from your cache

Strictly necessary cookies (Including session cookies).—these cookies are essential for you to be able to navigate our website and use its features. Without these cookies, the services you have asked for could not be provided. This also includes 'Session Cookies' - these allow our website to link your actions during a particular browser session. These expire each time you close your browser and do not remain on your device afterwards.

Performance cookies—these cookies collect information about how you use our website, e.g. which pages you go to most often. These cookies do not collect personally identifiable information about you. All information collected by these cookies is aggregated and anonymous, and is only used to improve how our website works

Functionality cookies—these cookies allow our website to remember the choices you make (such as your username, language, last action and search preferences) and provide enhanced, more personal features. The information collected by these cookies is anonymous and cannot track your browsing activity on other websites
